Portfolio: omgoswami.vercel.app

SUMMARY

Data Science and Machine Learning fresher with hands-on experience building end-to-end predictive models using Python, SQL, Pandas, NumPy, and Scikit-learn. Skilled in data cleaning, exploratory data analysis (EDA), feature engineering, data visualization, model development, and evaluation. Experienced in applying Machine Learning and Retrieval-Augmented Generation (RAG) to practical projects using real-world data. Currently pursuing an MCA with a CGPA of 8.21 and seeking opportunities in Data Science, Machine Learning, AI, and Data Analytics.

SKILLS

Languages	Python, SQL,
Frameworks	NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn,TensorFlow
Tools	Jupyter Notebook, VS Code, Git, GitHub,
Databases	MySQL
Other Skills	Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA),Large Language Models (LLMs), Retrieval-Augmented Generation (RAG),

ADDITIONAL INFORMATION

Soft Skills	Problem Solving, Analytical Thinking, Continuous Learning, Time Management
Languages:	Gujarati (Native), Hindi (Professional), English (Intermediate)

PROJECTS

Train Route Analysis and Journey Time Prediction

- Python | Pandas | NumPy | Scikit-learn | Matplotlib | Seaborn | SQL | Git
- Analyzed real-world railway operational data to identify travel patterns, journey durations, delays, and route performance using Python, Pandas, and SQL.
- Cleaned and transformed train schedule data, handled missing values, standardized arrival and departure times, and engineered journey-related features.
- Evaluated model performance using standard regression metrics and documented the complete data science workflow.

RAG-Based AI Teaching Assistant

- Python, LLMs, RAG, NLP, Vector Database
- Developed an AI-powered teaching assistant using Retrieval-Augmented Generation to retrieve relevant information from Data Science course materials.
- Integrated semantic search with a Large Language Model to generate relevant, context-aware answers to student questions.

Customer Churn Prediction & Retention System

- Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
- Developed a Machine Learning classification system to predict customers at risk of leaving a company using customer demographic, service, and account-related data.
- Performed data cleaning, exploratory data analysis (EDA), feature engineering, preprocessing, model training, and evaluation to identify key churn factors and support customer retention strategies.

WORK EXPERIENCE

Independent Data Science Projects

Ahmedabad

- Developed end-to-end Data Science and Machine Learning projects using real-world datasets, covering data collection, cleaning, preprocessing, exploratory analysis, feature engineering, model training, and evaluation.
- Applied Python, SQL, Pandas, NumPy, Scikit-learn, and data visualization libraries to solve regression, predictive analytics, and data analysis problems.
- Used Git and GitHub for version control, project documentation, code management, and maintaining reproducible development workflows.
- Continuously strengthened practical knowledge of Machine Learning, Deep Learning, Large Language Models, Generative AI, and Retrieval-Augmented Generation.

EDUCATION

Master of Computer Applications (MCA)

LDRP Institute of Technology and Research, Gandhinagar

- August 2025–Present | CGPA: 8.21/10

Bachelor of Computer Applications (BCA)

Swami Sahajanand College of Computer Science, Bhavnagar

- 2022–2025

CERTIFICATES

Complete 2026 Python Bootcamp: Learn Python from Scratch

- CodeWithHarry

Complete 2026 Data Science

- CodeWithHarry
