SUMMARY

Proficient in data cleaning, exploratory data analysis (EDA), feature engineering, data visualization, and predictive modeling using Scikit-learn. Hands-on experience working with real-world datasets and building machine learning projects using NumPy, Pandas, and Matplotlib. Passionate about leveraging data-driven insights to solve business problems and continuously learning Deep Learning, LLMs, and Generative AI technologies.

EDUCATION

Kadi Sarva Vishwavidyalaya, Gandhinagar, Gujarat

Master of Computer Applications (MCA), CGPA: 8.21

2025 – Present

Swami Sahajanand College of Computer Science, Bhavnagar, Gujarat

Bachelor of Computer Applications (BCA)

Graduated: 2025

EXPERIENCE

Data Science Learner

December 2025 – Present

Personal Projects

Ahmedabad, Gujarat

- Applied Data Science and Machine Learning concepts through hands-on projects.
- Worked extensively with Python, NumPy, Pandas, SQL, and Scikit-learn.
- Performed data cleaning, preprocessing, exploratory data analysis (EDA), and visualization.
- Developed predictive machine learning models for classification and regression problems.
- Used Git and GitHub for version control and project collaboration.
- Improved analytical and problem-solving skills through real-world datasets and continuous learning.

PROJECTS

California Housing Price Prediction | Technologies: Python, Pandas, NumPy, Scikit-learn, Matplotlib

- Performed data cleaning and feature engineering on housing datasets.
- Conducted exploratory data analysis and visualized trends.
- Built and evaluated regression models for price prediction.
- Applied preprocessing techniques and model optimization strategies.

Customer Churn Prediction System | Technologies: Python, Pandas, Scikit-learn

- Built a machine learning classification model to predict customer churn.
- Performed data preprocessing, feature selection, and model evaluation.
- Analyzed customer behavior patterns and generated actionable insights.

Data Analysis Dashboard | Technologies: Python, Pandas, Matplotlib, SQL

- Cleaned and transformed raw datasets for analysis.
- Created visualizations and dashboards to identify trends and KPIs.
- Generated business insights through statistical analysis.

TECHNICAL SKILLS

Programming Languages: Python, SQL

Libraries & Frameworks: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn

Data Science Skills: Data Cleaning, Data Analysis, Exploratory Data Analysis (EDA), Feature Engineering, Data Visualization, Predictive Modeling, Statistics

Databases: MySQL

Tools & Platforms: Jupyter Notebook, Git, GitHub, VS Code, Microsoft Office

Currently Learning: Deep Learning, FastAPI, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG)

Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Communication Skills, Continuous Learning, Time Management

CERTIFICATIONS

Complete 2026 Python Bootcamp: Learn Python from Scratch – CodeWithHarry

Python Programming for Data Science (Add if completed)

SQL for Data Analysis (Add if completed)

Machine Learning Certification (Add if completed)

ACHIEVEMENTS

- Built multiple end-to-end Data Science and Machine Learning projects. - Consistently practicing SQL and Machine Learning problem-solving. - Actively learning Artificial Intelligence, Deep Learning, and Generative AI technologies.

LANGUAGES

- Gujarati – Native - Hindi – Professional - English – Intermediate

ADDITIONAL INFORMATION

- Eligible to work in India. - Open to Internship and Full-Time opportunities. - Immediate Joining Available. - Willing to Relocate Anywhere in India.
